

Amazon is offering teams more flexibility on where to work. [Read more](#) from Amazon CEO, Andy Jassy.

# Game Data Analyst

Job ID: 1967156 | Amazon.com Services LLC

## DESCRIPTION

### Job summary

Amazon is all-in on games, and our mission is to be the most customer-obsessed company in the games industry. At Amazon Games, we’re creating compelling games like New World, a sandbox MMO set on a supernatural continent, as well as several - as of yet - undisclosed titles. Amazon Games is also delivering great game benefits to Prime members each month via Prime Gaming, and providing game developers of all sizes with the tools they need to succeed with Amazon Game Tech.

We are looking for an experienced Data Analyst to join our team in bringing our live operations games to market and developing and growing business opportunities for Amazon.

As a Data Analyst in Amazon Games you will provide insight for and drive key business and game initiatives. You'll work closely with product manager, game designers, and leadership to analyze and find solutions to modern gaming challenges.

Amazon Games applies the principles of Amazonian culture to the world of game design. We have a diverse team of talented, creative people pairing their love of making games with the unique strengths that come with being part of Amazon. Across all of our teams and locations, we are united by a common purpose: to share great gaming experiences with customers around the world. We believe in a future where everyone is a gamer and everyone can create, compete, collaborate and connect through games, and we are looking for the right people to help us build that future. With the power of Twitch and AWS at your fingertips, you will have the chance to innovate in gameplay, creativity, marketing, and technology, while working alongside some of the smartest and most creative minds in the industry.

### Inclusive Culture, Work/Life Balance, & Career Growth

We embrace our differences and are committed to furthering our culture of inclusion. We offer ten employee-led affinity groups with 190 global chapters, innovative benefits, and annual and ongoing learning experiences (including our Conversations on Race and Ethnicity (CORE) and AmazeCon (gender diversity) conferences). Our team also puts a high value on work-life balance and offers flexible working hours. We believe striking the right balance between your personal and professional life is critical to life-long happiness and fulfillment. Additionally, our team is dedicated to supporting you with mentorship and pathways for ongoing development. We have a broad mix of experience levels and tenures, and are building an environment that celebrates knowledge sharing and promotes career choice.

## BASIC QUALIFICATIONS

- 5+ Years of experience in analytics or related field
- 3+ Years of experience in gaming analytics
- 1+ Years working on live-operations games

## PREFERRED QUALIFICATIONS

- Experience in both mobile and non-mobile platforms
- Proficiency in Python
- Expertise in data modeling
- Advanced SQL skills
- Basic python skills
- Clear, concise, accurate communication (both verbal and written) with audiences of varying technical abilities and business contexts
- Passion for gaming
